

Changes

All dates are UK format.

13/05/22 4.2.0

drdonk:

- Split unlocker.exe into 2 new files unlock.exe and relock.exe so can be directly executed on Windows without having to pass a parameter to install or uninstall
- Added Windows manifest to allow the executables to directly run as Administrator without using re-spawn code
- Minimize false AV detection especially Windows Defender
- Added a new command to check the status of the patching called check.exe
- Fix to restarting vmware-tray.exe on Windows which had the wrong working directory

03/03/22 4.1.3

drdonk:

- Update VMware Tools to version 12.0.0

15/02/22 4.1.2

drdonk:

- Fix stopping/starting services on Windows due to service dependencies

26/01/22 4.1.1

drdonk:

- Fix copying of VMware tools ISO to the VMware installation folder
- Added a new troubleshooting page
- Updated copyright to 2022

09/12/21 4.1.0

Changed version to 4.1.0 due to the large number of changes to code submitted by boostchicken.
Thanks to boostchicken for the fixes and improvements to the code.

boostchicken:

- Refactor to be more go like
- Fix vmware-shell-ext-thunker.exe preventing patching on windows
- Fixed header offset bug and binpack allocs
- Cleaned up logic regarding restoring backups or not
- Elevate permissions on Windows automatically

drdonk:

- Key press message changed to correct input of enter key
- Build macOS dumpsmc executable

06/12/21 4.0.0

- Initial release
